

## Cumberland Project Fact Sheet

## **Project Overview:**

- On July 22, 2022, Tennessee Gas Pipeline Company, L.L.C. (TGP), a Kinder Morgan, Inc. company, submitted an application for a certificate of public convenience and necessity for TGP's proposed Cumberland Project with the Federal Energy Regulatory Commission (FERC) (assigned Docket No. CP22-493-000).
- The Cumberland Project will provide approximately 245,000 dekatherms per day of additional natural gas transportation to the Project shipper (Tennessee Valley Authority (TVA)) to support TVA's proposed retirement and replacement of an existing coal fired power plant with a natural gas fired, combined cycle power plant, subject to the completion of TVA's environmental reviews and final executive approval of its retirement and replacement project.
- The Cumberland Project includes construction of an approximately 32 mile, 30-inch pipeline lateral originating from TGP's existing 100 Line in Dickson County, Tennessee and terminating at a proposed power plant in Stewart County, Tennessee. The pipeline lateral would be located generally parallel and adjacent to existing utility easements.
- Pending the receipt of all required permits and clearances, construction is scheduled to begin in August 2024, with an expected in-service date of September 1, 2025.

## **Project Benefits:**

- The approximately \$225 million investment in the Cumberland Project in the State of Tennessee would create approximately 500 temporary construction jobs.
- Workers would rely upon local businesses, housing, and support services during the construction period, providing a positive economic impact in the areas where the project would be constructed.

## **Estimated Project Schedule:**

- Agency and Stakeholder Meetings Ongoing
- FERC Certificate Process— Commenced July 2022
- Begin Construction Tentatively August 2024
- Proposed In-Service Date September 1, 2025
